

# Accessing camera feeds

The address for the Zoneminder interface and camera feeds is

<https://zm.groundtruth.nz/>

Your username is your email address (all lower case). Passwords are case sensitive.

After logging in you should be taken to the camera "Console" which lists all the cameras you have access to.

The screenshot shows the Groundtruth interface with the 'Console' menu selected. A red arrow points to the 'Console' menu item. Below the navigation bar, there are search and filter fields for Name, Function, Status, Source, and Monitor. The main content area displays a table of camera feeds with columns for Name, Function, Source, Events, Hour, Day, Week, Month, Archived, and Zones. The table lists three cameras: Abel Tasman - Torrent Bay, Abel Tasman - Anchorage, and Horoirangi.

Name	Function	Source	Events	Hour	Day	Week	Month	Archived	Zones
Abel Tasman - Torrent Bay	Nodect Capturing 2.27 fps 71.4kB/s	114.23.113.54	0B	0B	0B	0B	0B	0B	1
Abel Tasman - Anchorage	Record Capturing 2.13 fps 43.96kB/s	114.23.113.54	1933 107.7GB	6 197.25MB	135 7.29GB	945 49.23GB	1931 107.7GB	0B	1
Horoirangi	Record Capturing 4.00 fps 84.52kB/s	horoirangi.dynu.com	1977 145.41GB	6 591.18MB	141 8.04GB	989 68.35GB	1973 145.41GB	0B	1
	199.88kB/s		3910 253.11GB	12 788.43MB	276 15.33GB	1934 117.58GB	3904 253.11GB	0 0B	3

To get back to this list, select the Console menu option

To view the camera, click its name.

The camera page has a scale dropdown at the top above the video - normally you will want to use the "Scale to Fit" option but sometimes you may want to make it smaller to access the controls, or bigger to look at something in more detail.

Under the video image are camera controls - these may vary depending on the type of camera and your access permissions. The controls can be delayed - click once and wait a few seconds. If nothing happens wait a few more seconds! Don't click more than once if nothing happens.

Click Tele and Wide arrows to zoom in and out, and the Pan/Tilt arrows to move the camera around.

The most recent recordings are listed below the video - they are in 10-minute chunks so you can quickly review or download the videos.

To see all the past week's recordings, go to the console list and then click the number in the week column. That will show all the recordings - you can page through them, or click the View all link at the top of the page.

The screenshot shows the Groundtruth console interface. At the top, there are navigation tabs: Console, Groups, Filters, Cycle, Montage, Montage Review, and Audit Events Report. Below the tabs, there are search filters for Name, Function, Status, Source, and Monitor. A status bar indicates 'Capturing 100%' and system metrics like 'Load: 2.92', 'DB: 58/151', and 'Storage: Default: 93% / dev/shm: 11%'. Below the filters, there are buttons for ADD, EDIT, DELETE, and SELECT. The main part of the interface is a table with the following columns: Name, Function, Source, Events, Hour, Day, Week, Month, Archived, and Zones. The table contains three rows of data:

Name	Function	Source	Events	Hour	Day	Week	Month	Archived	Zones
Abel Tasman - Torrent Bay	Nodect Capturing 1.82 fps 70.66kB/s	114.23.113.54	0B	0B	0B	0B	0B	0B	1
Abel Tasman - Anchorage	Record Capturing 2.27 fps 56.96kB/s	114.23.113.54	1932 107.51GB	6 176.33MB	134 7.2GB	945 49.24GB	1930 107.51GB	0B	1
Horoirangi	Record Capturing 4.00 fps 86.3kB/s	horoirangi.dynu.com	1977 145.39GB	6 612.01MB	141 8.03GB	989 68.31GB	1973 145.39GB	0B	1
